

Backend Developer with 2+ years of experience building scalable and secure web applications using Node.js, NestJS, Express.js, and MongoDB. Strong expertise in REST API development, microservices architecture, real-time systems (WebSockets, Socket.io), and database optimization. Proven track record in delivering high-performance backend solutions. Experienced in Agile development, version control (Git), CI/CD and API testing (Postman).

CAREER EXPERIENCE

Software Engineer

NUWAVE Communications, Inc.

Apr 2026 - Present

Ahmedabad

- Developing and enhancing enterprise communication platform features using **PHP (Yii2), Next.js, and MySQL**, focusing on scalability, performance, and user experience.
- Working closely with cross-functional teams to deliver product enhancements, troubleshoot issues, and improve system performance and stability.

Node.js Developer

Samcomtechnobrain

Jun 2025 - Oct 2025

Ahmedabad

- Developed and maintained scalable RESTful APIs using **Node.js, Express.js, and MongoDB**, improving system performance and reliability.
- Built real-time applications using **Socket.io and WebSockets** for instant data updates and live user interactions.
- Worked on microservices architecture using **NestJS**, creating modular, scalable services and improving system maintainability and deployment flexibility.

Jr. Software Developer

ZenDevX Solutions Pvt. Ltd.

Sept 2023 - May 2025

Ahmedabad

- Worked on multiple enterprise-level applications using **Node.js, Express.js, MongoDB, MySQL**, focusing on backend business logic and data structures.
- Collaborated closely with senior developers, clients, and cross-functional teams.

PROJECTS

Chat App

- Developed chat modules using **NestJS, MongoDB, WebSockets**, enabling real-time one-to-one and group messaging.
- Implemented WebSocket gateways for real-time message delivery, typing indicators, and online status.
- Designed chat schema in MongoDB including message documents, participants, and conversation history.
- Built API endpoints for chat creation, message retrieval, unread message count, and group updates.

Leave Management System

- Developed a full-stack Leave Management System to streamline employee leave requests, approvals, and tracking using **React.js, Node.js, Express.js, and MongoDB**.
- Implemented role-based authentication (Admin, Manager, Employee) for secure access and workflow control.
- Designed RESTful APIs for leave application, approval/rejection, leave balance tracking, and history management.
- Developed a responsive frontend (React.js) for user dashboard, leave tracking.

CodeScope – GitHub Repository Analyzer

- Developed an AI-powered GitHub repository analyzer to evaluate code quality, structure, and insights from public repositories.
- Built backend services using Node.js and Express.js for processing repository analysis, handling API requests and Rate Limiting.

Ortho Care

- Developed modules using **Node.js, Express.js & MongoDB** for patient onboarding, medical history tracking, and doctor consultations.
- Developed secure doctor-patient communication flows and virtual consultation modules, integrating real-time data exchange and session management.

Ecommerce App

- Built backend modules using **NestJS, MongoDB**, including product management, categories, authentication, and checkout workflow.
- Developed order creation logic, price calculations, and applied business rules for cart updates, and tax handling.
- Integrated frontend **React.js** with backend APIs, ensuring smooth data flow and optimal performance.
- Implemented role-based access for admin and customer modules.

EDUCATION

B.Tech in Computer Engineering, *Silver Oak University*

2021-2025

SKILLS

Backend Technologies	Node.js , NestJS , Express.js
Databases	MongoDB, MySQL, PostgreSQL
Real-time	WebSockets, Socket.io
Frontend	NextJS , React.js, HTML, CSS, JavaScript
Tools & Others	Git, Postman, RESTful APIs, MVC Architecture, Microservices
